DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirkevold et al.'322. Kirkevold discloses a product repairing method (as seen in flowcharts in figures 1-3) having the steps of receiving a repair request from a user (as demonstrated by a/the customer bringing their respective in for service/repair), diagnosing that repair (figure 1) and if the part is available, affecting that repair. Also, Kirkevold discloses the "parts availability" being connected to a parts data base 32 which could be joined with other dealerships (column 1, lines 14-21 and column 4, lines 56-60), this connection to other dealerships would obviously show what the other dealership has on hand and the price for such a part which would allow for the purchase and/or transfer of that part. Also, it is common and well known throughout the auto industry to have a "special order parts" system, which allows for the prepayment (or leave a deposit for) and special order of needed parts should none be available locally

or in a timely manner. Further, Kirkevold discloses giving the customer a printed and itemized list of repair activities (column 20, lines 20-47) once such repairs are affected as well as storing all customer data, this including repairs, parts used and basic customer information (column 20, lines 48-67).
